Education

- 2012 **Ph.D., Massachusetts Institute of Technology**, Cambridge, MA
Media Arts & Sciences
Committee: Mitchel Resnick (chair), Yochai Benkler, Rob Miller, Tim Berners-Lee (examiner)
- 2007 **M.S., Massachusetts Institute of Technology**, Cambridge, MA
Media Arts & Sciences
Committee: Mitchel Resnick (chair), Sandy (Alex) Pentland, Henry Jenkins
- 2001 **B.S., Tecnológico de Monterrey**, Monterrey, México
Computer Engineering

Research Interests

Human-computer Interaction, Social Computing

Employment

- 2021-present *Assistant Professor*, Computer Science, Princeton University, Princeton, NJ
Director, Human-computer interaction Lab
- 2017-2022 *Principal Research Scientist, Manager*, Snap Inc., Seattle, WA
Managed the Human-computer interaction Research team.
Reported to Bobby Murphy, co-founder and CTO
- 2017-2022 *Lead Research Scientist, Manager*, Snap Inc., Seattle, WA
Founded the Human-computer Interaction Research team.
- 2012-2017 *Researcher*, Microsoft Research, Redmond, WA
In the leadership team of FUSE Labs.
Reported to Lili Cheng, Corporate Vice President.
- 2011-2012 *Postdoc*, Microsoft Research, Cambridge, MA
- 2010 *Intern*, Microsoft Research, Cambridge, MA
Reported to Dr. danah boyd, Principal Researcher
- 2005-2010 *Research Assistant*, MIT Media Lab, Cambridge, MA
- 2001-2005 *Software Engineer*, Ex Libris Group, Newton, MA
Reported to Oren Beit-Arie, Chief Strategy Officer
- 2000 *Research Intern*, Los Alamos National Laboratory, Los Alamos, NM
- 1999-2000 *Research Assistant*, Tecnológico de Monterrey, Monterrey, México

Honors and Awards

2023	E. Lawrence Keyes, Jr./Emerson Electric Co. Faculty Advancement Award
2022	Outstanding teaching award (twice), Princeton School of Engineering and Applied Science
2011-2022	Five best paper awards: CSCW '22, '13; CHI '14; HCOMP '15, and ICWSM '11
2013-2021	Four best paper honorable mentions: CHI '21, '15, '13; and CSCW '16
2013	CNET's Most Influential Latinos in Technology
2013	Top 35 Innovator under 35, MIT Technology Review (Latin America)
2012	Boston Business Journal, Emerging Leader
2011	Fellowship, Berkman Center for Internet & Society at Harvard University
2009	Scholarship, Oxford Internet Institute Summer Doctoral Program
2008c	Honorable Mention, Ars Electronica Prix, Digital Communities
2008b	Winning team of the MacArthur Digital Media and Learning Competition
2008a	Bradesco Fellowship, MIT Media Lab
2007	Samsung Fellowship, MIT Media Lab
2005-2006	Telmex Fellowship, MIT Media Lab

Grants

2023	\$50,000 from the Mozilla Technology Fund for “ <i>The Workers’ Algorithm Observatory</i> .” With colleagues at UC Boulder and MIT.
2022	\$61,560 from the National Science Foundation (NSF) for “ <i>Designing Technologies for Marginalized Communities</i> .” Award no. 2210843. With colleagues from the University of Michigan, U.C. Irvine, and Northwestern University.
2009	Amazon.com Research Award to run Scratch on AWS.

Publications

Top-tier venues in human-computer interaction research appear at ACM, AAAI, and IEEE conferences, such as CHI, CSCW, and ICWSM. In 2018, CSCW transitioned to a hybrid journal structure and renamed itself Proceedings of the ACM: CSCW (PACM: CSCW). Students are typically named first in human-computer interaction research, and faculty last. The symbol 🎓 denotes Princeton undergraduate students, 🏆 denotes a “best paper award,” and 🥈 a “best paper honorable mention.” Authors in orange are Princeton students, and postdocs, purple are students from the University of Washington.

Software, Products

2021-2022	<i>Project IRL</i> . I led a team that launched a suite of co-located Augmented Reality experiences used by millions of people on Snapchat designed to foster playful in-person interactions.
2020-2021	<i>Significant Otter</i> and <i>BFF</i> . I led a team that launched two experimental Apple Watch apps for couples used by tens of thousands of people . The app explored new ways of leveraging biosignals to support more authentic interactions among close ties. The apps were recognized and featured by Apple and Product Hunt.
2015-2017	<i>Microsoft Scheduler</i> (née Calendar.help). I led a team at Microsoft Research that created a virtual scheduling assistant powered by human and machine intelligence. The product was released as a <i>Microsoft's Office</i> service, and the assistant branded as a <i>Cortana</i> . The product is now used by thousands of organizations .
2014	<i>Microsoft Journeys and Notes</i> . I led a team at Microsoft Research that created an urban computing app for travelers and commuters to connect with one another. The app was released on Google Play and was installed by tens of thousands of people from around the world.
2013	<i>Microsoft Picotale</i> . Web-based tool for creating and sharing image macros, aka “memes.” Shipped as a feature in Microsoft’s So.cl platform. Used by tens of thousands of people.
2013	<i>Microsoft Whoo.ly</i> . I was part of a 3-person team at Microsoft Research that created a novel tool for highlighting hyperlocal content from Twitter. This product shipped as a Microsoft Research project and was used by thousands of people.
2007-2012	<i>Scratch Online Community</i> . I led a team at MIT that created the Scratch online community, a website where children from around the world learn to program, share, and remix animations and video games. The community has grown to over 40 million people from around the world.
2007	<i>Sana</i> . Along with physician Leo Celi, I developed a mobile health app for nurses to share images of pre-cancerous tissue with remote doctors. This project was piloted with a health organization in Zambia, and is now an academic program at MIT.
2001-2005	<i>SFX</i> . I was one of two programmers at Ex Libris that developed an application to help people download the full-text of scholarly publications. This project grew out of research on library automation systems and was released by Ex Libris. The product is used by most libraries in universities and research institutions around the world.
2001-2005	<i>Phronesis</i> . I was one of the developers that created an application to create online repositories of documents. Dozens of libraries around the world used the software.
